

CORNWALL

DESCRIPTION AND CARE INSTRUCTIONS

Leather is a natural product – each hide is unique and carries the natural characteristics of its origin, which will vary from hide to hide. As leather ages, it matures and develops a patina.

GENERAL

- Avoid direct sunlight on the leather.
- Avoid direct heat onto the leather.
- Avoid placing the leather next to a heat source.
- Dust and vacuum regularly to avoid a build-up of dust; if vacuuming, use a soft head attachment
- Wipe off stains and spills immediately with a clean, soft, lightly damp cloth, taking care not to soak the leather.
- Avoid being near any leather with any pen or ink.
- Do not use standard household cleaning products, as these may react with the finish, causing cracking.
- Do not use saddle soap or shoe polish on the leather.

CORNWALL

- Cow hide average hide size will be five sqm. Chrome-tanned aniline through dyed, whole grain oiled, and polished finish.
- The leather shows some healed scratches and neck and belly wrinkles, which will be apparent because of the aniline finish.
- The use of oil in the finishing makes this leather feel natural and has a luster effect.

CARE INSTRUCTIONS

- Aniline leathers are generally delicate, so strong cleaning products should not be used,
- Alma recommends using aniline cleaner once every week, which will keep the leather clean and fresh; the leather clinic Moisturise will keep the leather hydrated and maintain its moisture content, which is essential for its life.
