

# FAUX WOVEN

## DESCRIPTION AND CARE INSTRUCTIONS

### GENERAL

- Vacuum cleaning is enough for everyday care of these woven mats.
- To remove any loose dirt, wipe the rug with a lightly damp soft cloth in the weft direction.
- If you use it as a rug, you should roll it loosely and place it vertically on a flat surface, on an air corridor.

### FAUX WOVEN

- Stains or spots should be removed straight away. Remember to clean gently. Any dried surface stains, such as food and other protein, should be scraped off; be careful not to damage the material's surface.
- Never scrub or rub. Specially, avoid scratching when the surface is wet. Any liquids (juice, etc., water-soluble liquids) spilled onto the mat surface should be dabbed immediately with a white paper towel or absorbent cotton terry towel.
- Wet a cotton towel with cold water and squeeze out excess water. The affected area should be treated by tapping it with a damp towel. A drop of mild washing-up liquid can also be added.
- Rinse out by using a clean, damp sponge or towel.
- Finally, dry the affected area by tapping it with a dry towel and blot the moisture.
- It is also advisable to use neutral soap wet towels such as the ones used for baby care.
