

TERRA

DESCRIPTION AND CARE INSTRUCTIONS

Leather is a natural product – each hide is unique and carries the natural characteristics of its origin, which will vary from hide to hide. As leather ages, it matures and develops a patina.

GENERAL

- Avoid direct sunlight on the leather.
- Avoid direct heat onto the leather.
- Avoid placing the leather next to a heat source.
- Dust and vacuum regularly to avoid a build-up of dust; if vacuuming, use a soft head attachment
- Wipe off stains and spills immediately with a clean, soft, lightly damp cloth, taking care not to soak the leather.
- Avoid being near any leather with any pen or ink.
- Do not use standard household cleaning products, as these may react with the finish, causing cracking.
- Do not use saddle soap or shoe polish on the leather.

TERRA

- European cow, thickness 1.4/1.6mm, Average hide size will be five sqm. Veg was tanned, aniline was dyed, and Wax was applied to the finish to get a two-tone look.
- The leather shows some healed scratches neck, and belly wrinkles, which will be apparent because of the naked finish.
- Using wax in the finishing makes this leather feel natural polish and a wet touch with a mild pull-up effect.

CARE INSTRUCTIONS

- Aniline leathers are generally delicate, so strong cleaning products should not be used.
- Alma recommends using Leather Clinic Gentle Cleanse once every week to keep the leather clean and fresh; the Leather Clinic Moisturise will keep the floor hydrated and maintain the moisture content of the leather, which is essential for the life of the leather.
