

VEGTAN

DESCRIPTION AND CARE INSTRUCTIONS

Leather is a natural product – each hide is unique and carries the natural characteristics of its origin, which will vary from hide to hide. As leather ages, it matures and develops a patina.

GENERAL

- Avoid direct sunlight on the leather.
- Avoid direct heat onto the leather.
- Avoid placing the leather next to a heat source.
- Dust and vacuum regularly to avoid a build-up of dust; if vacuuming, use a soft head attachment
- Wipe off stains and spills immediately with a clean, soft, lightly damp cloth, taking care not to soak the leather.
- Avoid being near any leather with any pen or ink.
- Do not use standard household cleaning products, as these may react with the finish, causing cracking.
- Do not use saddle soap or shoe polish on the leather.

VEGAN

- Vegetable tanned cow shoulders
- Drum-dyed aniline leather.
- This leather does not have any protection on top.

CARE INSTRUCTIONS

- All veg tan leathers can be scratched quickly but can be polished to remove the scratches.
- Avoid any sharp objects in contact with this leather. Due to their tanning nature, these leathers can change color over time due to oxidation.
